

VISY-STICK FLEX – LEVEL MEASUREMENT IN TALL TANKS

Highly accurate & flexible sensors for **COST-EFFECTIVE** installation!

ABOUT FAFNIR

Level sensors and systems, expertly engineered

FAFNIR are specialists in the development and manufacturing of high precision sensors and systems for monitoring and measuring fill levels in industrial environments

Quality German
Engineering

Unparalleled reliability
in all environments

Highest safety
standards

Field tested across 1000s
of installations worldwide

The **VISY-Stick Flex** is a specially designed highly accurate magnetostrictive level sensor for tall tanks. Due to its special design & easy installation, it can be packed compactly and shipped at low costs.

Now, also available is the **VISY-Stick Flex Temp** sensor with up to 32 temperature sensors for enhanced temperature measurement.

VISY-Stick Flex - FEATURES

TALL TANKS

Extreme flexible probe length

Probe length up to 22 meters

4 in 1 measurement

Product level, bottom water, temperature and density

High quality and reliability

All probes are 100% made of stainless steel and are calibrated on the factory

Easy installation and transportation

Available with cable and also wireless connection

FLEX probe is available for:

- ✓ Fuel depots
- ✓ Solvent storage
- ✓ Barges
- and more...
