LS 300 and LS 500

Protect Your Most Valuable Assets with the LS 300 and LS 500 Level Detection and Overfill Solution: Thermal Level Detector

With the FAFNIR thermal level detector (LS 300 with LS 500) with ATEX approval, your business and valuable liquid assets are protected. Our solution comprises a sensor, LS 300, which sits inside the tank and a transducer, LS 500, which manages the output relays. For polluting, corrosive and expensive liquids, the LS 300 with LS 500 certified as overfill prevention is an indispensable component for environmental and business protection.

Why Choose LS 300 with LS 500?

Quick and Precise

- + Easy installation due to a 2-wire connection to the transducer, protected against reverse polarity
- The level detector requires no maintenance after installation, no hidden costs
- + No on-site calibration required

Dependable

- + Full and empty alarms for containers, storage tanks, underground and above-ground tanks, IBCs, tank wagons, barrels, bottles and collecting vats
- + Proven: tens of thousands of installations across Europe
- + Self-testing sensors
- + The overfill prevention fulfills the requirements of the German Water Resources Act (WHG)
- + SIL 2 certified

Durable

- + With no moving parts, the LS 300 boasts excellent life expectancy and outstanding reliability
- + Space-saving, robust and corrosion-free design
- + Adaptable, flexible; with an intermediate flange which is only 3mm in diameter or with DN 200 flange, we have a solution for almost any application

Applications

- + Any tank type or size
- + Collecting vats
- + Pilot plants and prototype systems
- + Tank arms for filling

Versions

Our LS 300 Standard sensor is suitable for most process connections, with variable screw-in unit or welded flange. For mobile applications with plug, for very critical applications also with pneumatic test connection, to test the sensor not only electronically, but the real physical measurement principal. For vehicles, tank containers and tanks which are moved frequently, we also offer our level detector with a plug. This allows a quick coupling and decoupling of the level detector.

Steck and Duo Versions

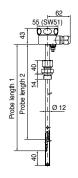

For all applications where you need more than one level detector for your process control or as a warning in addition to the overfill protection. For vehicles, tank containers, and tanks which are moved frequently, we also offer our level detector with a plug. This allows a quick coupling and decoupling of the level detector.
